Autodesk, Inc. (NASDAQ: ADSK) makes software for people who make things. We are a global leader in design and make software for architecture, engineering, construction, manufacturing, and media and entertainment industries. If you’ve ever driven a high-performance car, admired a towering skyscraper, used a smartphone, or watched a great film, chances are you’ve experienced what millions of Autodesk customers have built with our software.

At Autodesk, we exist to turn ideas into new realities that shape a thriving future. Our software and services harness emerging technologies—such as additive manufacturing (3D printing), artificial intelligence, generative design, and robotics—that give companies and individuals the power to work more quickly, effectively, and sustainably throughout the entire project lifecycle.

Autodesk is committed to making a positive impact on the world with our technology, philanthropic investments, education initiatives, business operations, and employee programs. We donate software to eligible nonprofits, startups, and entrepreneurs that are using design for environmental or social good. We also prepare the next generation of designers and makers for the future workplace by providing students and educational institutions globally with access to professional software, training, programs, communities, and industry insights.

Our customers
Autodesk software helps customers solve important design and make, business, environmental, and societal challenges, pushing the boundaries of AEC (architecture, engineering, and construction), manufacturing, and M&E (media and entertainment).
